SEMINAR

SAP Netweaver technology platform – History and evolution

Ing. Emilio Leo
CST Consulting

20th April 2011, h 11:00 - 13:00
Conference room – Dept. of Computer Engineering and Systems Science
Floor D

Abstract:
The talk will address the evolution of IT scenarios in business applications: from mainframes to SAP eSOA architectures. A quick overview of mySAP Business suite applications and the SAP Netweaver platform architecture will then be presented. Finally, the business needs in the technology management of an SAP complex architecture will be discussed.

Biography:
Emilio Leo received the degree, cum laude, in Electronic Engineering from the University of Pavia in 2001 with a thesis work realized at the Darmstadt University of Technology, Germany. He joined SAP in 2002 as a technology consultant with specialization in monitoring of SAP complex and heterogeneous architectures. In 2006 he was promoted to Netweaver Senior Technology Consultant & Technical Solution Architect in SAP reaching also the certification of "SAP XI Technology Consultant". In 2007 he joined CST Consulting as technology team leader with the mission of building the Netweaver Technology Business Unit, where he became in 2009 a Business Unit Manager.
